Football , traveling

PROFESSIONAL EXPERIENCE

Freelencer

Web developer

present | Béni Mellal, Maroc

- Develop and deploy WordPress-based websites according to the specific needs of clients.
- Transform graphic mockups or PSD designs into responsive and functional WordPress websites.
- Improve the speed and performance of WordPress sites.
- Generation of invoices with unique ID
- Maintenance and Updates, Security, Problem Solving

Media Expert

Frontend Developer

12/2021 – 03/2022 | casablanca

In my role on a development team, I focused on developing secure authentication systems using Firebase for both phone and email verifications. My expertise in React helped me create responsive interfaces for a smooth authentication experience. Also, as a WordPress developer, I improved user experiences by customizing themes and plugins, ensuring both usability and security.

SKILLS

HTML/CSS/SCSS (Mobile first design, Accessibility, Converting PSd files, Semantic HTML5, Flexbox & Grid layout, Animation...)

CSS Frameworks (Bootstrap, Tailwind, My own Framework)

javascript /Typescript/ EC6 (DOM, APIs, Modules, Async/sync code, promises...)

Javascript

React Js (React Router, React Navigation, Hooks, Redux , React Hook Form..)

Node.js

Tools: NPM, Gulp, NPM Scripts, ESLint, Prettier... (Automating tasks, watching, formatting, debugging, configuring ESLint & Prettier files ...)

GIT / Github / Gitlab (merging, collaborating, dealing with conflicts)

CLI (basic commands for editing, navigation, configuring..)

PROJECTS

RENTAL HOUSES

Rental houses is a CRUD Application has a fully functional dashboard, a property management page, and a users page - both connected to our database and a profile page that connects the two it has build using the following technologies :

- Node.js, Express.js, MongoDB, and React.js that together form the powerful MERN stack
- Material UI: The most popular UI Component Kit nowadays
- TypeScript
- optimize images and store them on the cloud using Cloudinary
- Provide a quick and easy way for users to log in and register using Google ****Authentication .

USERS AND CHECK MANAGEMENT

is responsive app to add users from an admin . it has been built using Manual Graphic desing (GUI) java & postgresQL. A responsive application designed to manage user profiles, built with a manually crafted graphical user interface (GUI) using Java and backed by a PostgreSQL database. This application provides several key functionalities:

- Search Functionality: Enables searching for users by their ID, allowing for quick and efficient access to user profiles.
- Admin Capabilities: Admin users have the ability to add new users and modify existing user information, ensuring that user data can be kept up-to-date and accurate.
- User Interactions: Users have the capability to add their checks and fill out information on their profiles, promoting user engagement and data completeness.
